Additional Information on Tracking Technologies

We use common tracking technologies.

We collect personal information about users over time and across different websites when you use this website, app or service. We also have third parties that collect personal information this way. To do this, we use several common tracking tools. Our vendors may also use these tools. These may include browser cookies. We may also use web beacons, flash cookies, and similar technologies.

We use tracking technologies for a variety of reasons.

We use tracking tools:

- To recognize new or past visitors.

- To store your password if you are registered on our site.

- To improve our website.

- To observe your behaviors and browsing activities over time across multiple websites or other platforms.

- To better understand the interests of our customers and our website visitors.

You can control certain tracking tools.

Your browser may give you the ability to control cookies. How you do so depends on the type of cookie. Certain browsers can be set to reject browser cookies. To control flash cookies, which we may use from time to time, you can go here. Why? Because flash cookies cannot be controlled through your browser settings.

Our Do Not Track Policy: Some websites have "do not track" features that allow you to tell a website not to track you. These features are not all uniform. We do not currently respond to those signals. If you block cookies, certain features on our sites may not work. If you block or reject cookies, not all of the tracking described here will stop.

Options you select above are both browser and device specific.
